Key Employees:

EHS Documents key employees include Holli Merchant and Candice Burns. Other resources are subcontracted on a routine basis from several networks of independent health, safety and environmental specialists, with whom we maintain contracts. This approach allows EHS to keep its overhead low and the quality of the work product high. EHS Documents commonly uses specialty trainers, hazardous waste specialists, water quality professionals and engineers from our network affiliates.

Holli Merchant, CIH, CSP

Holli Merchant is a Certified Industrial Hygienist and Certified Safety Professional with 22 years experience in health and safety program development. Holli has a Master's degree from the University of Denver in Environmental Policy and Management (Health and Safety emphasis), a Master's degree in Business Administration (MBA) from Colorado State University, and a Bachelor's degree Environmental, Populational and Organismic Biology from the University of Colorado. Prior to starting the company in October, 2004, Holli was a Principal at Mactec Engineering and Consulting. Holli managed over \$500,000 worth of projects annually, was responsible for the Health and Safety services department and assisted with corporate health and safety functions. Holli is the primary Project Manager for work at EHS Documents and the Industrial Hygiene and Safety technical resource.

Candice Burns, RT

Candice Burns is an Environmental Scientist for EHS Documents Inc. She has over 25 years experience in environmental compliance both for federal entities and in the private sector. She has a Bachelor's degree from the University of the State of New York in Biology, an Associate's degree in Radiation Protection from Northern New Mexico College, and an Associate's degree in Medical Radiology from Northern New Mexico College.

Prior to assisting with the start-up of EHS Documents, Candice was an Environmental Scientist for Engineering Management Concepts in Camarillo, California for nine years. Candice was contracted to the Department of Navy to assist the environmental departments of two naval bases with environmental issues. Specialties include: lead based paint inspections, regulatory reporting for EPCRA and CERCLA, chemical surveys, spill prevention plans, hazardous waste regulation compliance issues, storm water plans, endangered species inventories, and pollution prevention plans. She holds current California and Colorado state certifications as a Lead Inspector and Assessor. Candice is the primary Environmental Scientist for EHS Documents Inc.
